Eurowag and Axxès strengthen their collaboration

Eurowag, the fastest growing European mobility solutions provider together with Axxès, a major player in the mobility of transport operators in Europe, announced that they are renewing and extending their partnership, to provide a European interoperable tolling solution and added value services, to their customers.

A new partnership for win-win benefits

“We have been working with Eurowag since 2010. We are delighted to be able to renew the terms of our partnership and to provide Eurowag with our technical expertise. Also, being associated with a dynamic company such as Eurowag is undoubtedly a significant advantage for Axxès' development in Europe” declared Jérôme Lejeune, Chairman of Axxès.

The new, extended partnership will allow Eurowag to offer to its customers the benefits of Axxès' recognized white label solutions, built on a robust technical platform and a high-quality dedicated customer/partner relationship.

By equipping its customers with Axxès solution, Eurowag gives them the opportunity to travel throughout Europe and very soon in Italy and Germany with a single equipment, a single contract and a total transparency on prices.

A quality offer accessible to Eurowag customers

All Axxès solutions will be offered to Eurowag customers:

- OBU (On Board Unit): electronic toll device
- Axxès Fleet Manager: Real-time vehicle geolocation solution
- Access to the customer area for specific reporting.

Alongside the electronic toll device (On Board Unit), Eurowag customers will also receive access to Axxès Fleet Manager, a real-time vehicle geolocation solution and specific reporting on their trucks.

Martin Vohanka, CEO Eurowag concludes: "With the strengthening of its long term partnership with Axxès, Eurowag reinforces its position as a leading Toll Service Provider in Europe. By offering a single OBU and the highest possible discounts for our clients, we aim to simplify the life of our clients, which at the heart of all our Tolling activities. With a device for 7 countries including Germany and Italy coming soon, we will achieve that."

À propos d'Axxès :

Axxès, as EETS provider and with over 39,000 client companies, is the most dynamic player in the interoperable HGV toll market. It offers freight and passenger transporters an intelligent, reliable toll collection system for paying European tolls using a single on-board unit and a single subscription. It fully intends to continue developing its services to adapt to road transport companies' changing needs. This is why it designs innovative services based on the latest technologies, such as its geolocation service specialised in optimising and understanding toll costs. Its ambitions are to set the benchmark for interoperable toll collection in Europe and to be a higher value partner for road transporters.
