

TAKE THE LEAD

Press release
July 2, 2019

FRÉDÉRIC LEPEINTRE APPOINTED PRESIDENT OF AXXÈS

Axxès accelerates innovation and digitalization of mobility solutions for HGVs and appoints a new president

Since July 1st, 2019, Frédéric Lepeintre has been the new Chairman of Axxès, Europe's leader of heavy goods vehicle mobility (toll payment and optimization services). With 20 years of international experience in high technology and fintech (Diebold Nixdorf and then Ingenico group), he has become an experienced leader in the world of intelligent and connected solutions.

In a market that is increasingly open to competition and new technologies, Frédéric Lepeintre will lead the company's digital transformation and international expansion. The slogan TAKE THE LEAD makes sense for both Axxès and its customers.

European coverage, digitisation, AI: key elements for Axxès in 2023

Resolutely focused on innovation, it intends to promote the evolution of toll collection solutions, to provide its customers with ever more value and the ability to effectively manage their activities (digitalization of tolls, cost management, big data, AI in the service of efficient mobility).

« Axxès is recognized by its customers for the quality of its services, the robustness of its products and the expertise of its teams. It is our best asset to achieve our ambition and be the leader in the future who puts connected solutions at the service of customer efficiency ».

The arrival of the new President marks a new stage in Axxès' international growth, which aims to be present throughout Europe by 2023.

TAKE THE LEAD

About Axxès

as EETS provider, is the most dynamic player in the interoperable HGV toll market. It offers freight and passenger transporters an intelligent, reliable toll collection system for paying European tolls using a single on-board unit and a single subscription. It fully intends to continue developing its services to adapt to road transport companies' changing needs. This is why it designs innovative services based on the latest technologies, such as its geolocation service specialised in optimising and understanding toll costs. Its ambitions are to set the benchmark for interoperable toll collection in Europe and to be a higher value partner for road transporters. Find all our services and offers on our website, www.axxes.eu

Key figures :

- 1 billion in toll revenue
- 39000 customers
- 350,000 vehicles on 9 European networks
- 80 employees
